ENVIRONMENTAL POLICY FOR DIAMOND RESORTS™

Sustainability is a core value for team members at Diamond Resorts. As a global leader in hospitality, vacation ownership and management of resorts, we are dedicated to reducing our carbon footprint for a better future.

Diamond Resorts shares some of the sustainability initiatives our European destinations are practicing, and the way our members, owners and guests are helping to raise awareness of responsible travel. We are committed to protecting the environment and preventing pollution through:

- Energy saving initiatives in our resorts
- Optimisation of natural resources, especially drinking water
- A procurement policy that takes into account the acquisition of non-polluting materials, especially in relation to the use of cleaning products
- Waste recycling as much as possible
- Closely working with administrations and authorities to ensure compliance with applicable environmental legislation, regulations and obligations
- Involvement of all team members in the environmental management of our operations through continuous training and awareness campaigns
- Engaging our guests with activities and information on environmental aspects related to the use and enjoyment of our facilities, products and services
- Informing suppliers and contractors about the environmental criteria in our resorts and encouraging them to join us
- Maintaining an environmental management system that takes into consideration all risks and opportunities to allow continuous improvement and environmental impact reduction

Management is committed to providing the necessary human and material resources for the implementation of this policy.

Suzana Gomercic
Senior Vice President of European Resort Operations
