

## **Drone Rules (Canada)**

As per Transport Canada and FAA regulations, and to protect the safety and privacy of our members, owners, guests and team members, the operation of unmanned aerial systems and/or drones is prohibited by the general public, including recreational users and hobbyists. These devices may not be launched or operated from any Embarc property. If launched from outside of the resort property, the devices are prohibited from flying over and/or into the resort property boundaries. Transport Canada Regulations: Drones are prohibited from flying closer than 30 meters from people, animals, buildings, structures, or vehicles if they weigh over 250g up to 1kg and 76 meters if they weigh over 1kg up to 35kg. FAA Regulations: Any authorized operation of drones must be in accordance with Federal Aviation Administration (FAA) rules and regulations, local law enforcement, and US Forest Service rules, as well as those policies separately established by the Resort. These authorizations, regulations and rules generally require an application to the FAA, certification, training, various restrictions, safety and national security clearances, and a specific limited purpose, as well as insurance coverage, indemnification requirements, and waivers and releases of liability.
